

**We automate
your production !**

Why choose **STS816**

The semi-automatic labeling machine STS816 is a convenient and practical solution for small and medium production processes. The machine is compact and easy to operate. Capacity between 500 - 700 pieces / hour.

The work is done with roll labels. Label is detected through a non-contact ultrasonic sensor also produced by us. The applying-process is carried out automatically by feeding an envelope/bag/pouch to the machine. The envelope must be empty. The label is firmly attached to the envelope by shafts. Bags with zip or valve are allowed.

dimensions: 440x230x330mm
envelope width: 80 mm - 250 mm
envelope length: 120 mm - 350 mm
label width 25 mm - 230 mm
label length 25 mm - 300 mm

Produced in **Bulgaria**
